DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3, 4 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kubiak.

Kubiak shows a protective shield for a nozzle comprising all the featured elements of the instant invention.

3. Claims 1, 3-6 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Clements.

Clements shows a protective shield for a nozzle comprising all the featured elements of the instant invention.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clements.

Art Unit: 3752

Clements discloses all the featured elements of the instant invention except for the specific angle range of the planes and the specific method step of performing visualization tests. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the angles of the planes claimed since such a modification would depend on the required angle to ensure that the spray emerging does not contact the shield. As to the method step of performing spray visualization tests, such tests are well known in the spraying art and would be normally be performed to determine the optimal shape of the opening of the shield in the apparatus of Clements.

Allowable Subject Matter

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ehle et al and Hughf show protective shields for nozzles.

Art Unit: 3752

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is (571) 272-4899. The examiner can normally be reached on Monday, Tuesday, Wednesday, and Thursday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel, can be reached on (571) 272-4919. The fax phone number for this Group is (571) 273-8300.
